

To Whom It May Concern:

I whole heartedly support HB 6797. I am a sixty three year old male who has had a number of issues from diabetes to cancer. I understand the need for conventional medicine as it saved my life. I also see how working with an ND over the last four years has allowed me pain relief without the need for prescription drugs. I have used homeopathic remedies for stress and anxiety, blood sugar issues and acupuncture for pain and rebalancing.

I also recognize that sometimes alternative modalities might not be the best answer and prescription medication might be the best alternative. ND's have the educational training to also find the best solution for their patients. While many MD's are accepting ND's as colleagues, sadly many are not. This bill is what is best for the patient. The best of western medicine and alternative medicine is what is best for Connecticut's Citizens. This is your opportunity to really provide comprehensive healthcare for Connecticut Citizens.

Please pass this legislation and show the nation that Connecticut has healthcare.

Respectfully,

Dan Conte
